

Application Developer

Do you have a passion for helping to solve business problems by developing client specific website applications and tools? If you do, we thought you would like to know that we are adding an application programmer/developer to our team.

At SystemArchitecture.NET we help our clients use the Internet as an effective tool in their businesses and organizations. We pride ourselves on creating practical websites focused on efficiently meeting the needs of our clients and their audiences.

If you take personal pride in doing the best work you can, you think like we do. If you find yourself coding in your sleep, we know what it's like! If you are a focused self-starter comfortable working with a team, you will fit in well.

As a SystemArchitecture.NET Application Developer, you will be expected to plan, research, develop logic, code, test and deploy several projects with minimal assistance. You should know how to build a .NET application (Web and Windows Forms) from the ground up, as well as modify and build on existing code.

Our ideal candidate has in depth knowledge of:

ASP
.NET
C#/VB
JavaScript
SQL Server
jQuery/jQueryUI
Angular
Bootstrap

If you are passionate about development and you do it better than anyone else you know, please email your resume with a cover letter outlining your experience and salary requirements:
